How to Use a Sports Betting System

A lot of people believe that a sports betting system can make them rich, if they can only find the right one. For those people, there are all kinds of progressive betting schemes available for sale that advertise a 97% chance of winning.

The problem is that there is no such thing as a perfect betting system. If you believe there is one available, maybe Santa will bring it to you for Christmas. In the mean time, be prepared to lose a few dollars.

The magic of a betting system is not in its proximity to perfection. The truth is, a system that wins 55% of the time in the hands of a professional who knows what they are doing will win a lot more money than a system that wins 97% of the time in the hands of the average guy.

If you want to make a lot of money, you do not need perfection or anywhere near it. All it really takes is one or more systems that shift the long term probabilities in your favor.

If you know that you will win in the neighborhood of 55% of all the bets you place, all you need to do is place as many bets as you possibly can and count the profits at the end of the day.

That is the real secret to making a lot of money betting on sports. Place a lot of bets with a good system that gives you an edge in the long run. Some losses will happen, but you will win more than you lose.

That is what they call a profit, and accumulating that profit is how the professional thrives among the losers even when losing 45% of their bets.

Sports Betting as a Business

Many people who bet on sports dream about making enough money to do nothing but that. Ahhh, to quit the day job. Tell the boss to shove it. Oh, what a feeling it would be. At least, that's what they think. I would think those are mostly the same people who dream about making a fortune in real estate or with internet marketing.

Just as there are people who make a boat load of money selling products on the internet, there

are those who make a lot of money betting sports with online books.

What allows the few to succeed where the many fail? The successful are doers, not dreamers. They do not waste their time looking for shortcuts or magic systems. To them, it is a business venture rather than a pipe dream. They know there is work to be done before the easy money will come, so they do the work without worrying about the money.

If you want to be successful with a sports betting business, first you have to recognize that is a business. It requires far more than just placing willy nilly bets on every game you can find.

The successful sports bettor has a plan. They have systems to manage money, handicap games, etc. Like with any other business, if you have no plan you will fail.

If you want to win in sports betting, look at it like the business it is. Build yourself a sports betting business plan. Hire yourself as manager and put the plan in to action.

It all begins by building your handicapping systems that will pick more winners than losers. That's the part of the business plan that really separates the successes from the failures.
